This cumulative author index was developed as a service for the readership of *Education and Training in Mental Retardation*. It was prepared as a resource for scholars wishing to access the 1,277 articles published in the first twenty-five volumes of this journal.

Since many literature searches involve tracking authors across a program of studies and individual authors may not always be "first" authors this index was prepared with a cross-reference of all authors to each citation. In total, 2,293 author citations are included in this reference.

It is our hope that this bibliographic index will be of help to those of you wishing to access trends, issues, and research on education and training in mental retardation.

This document was produced with partial support from U.S. Department of Education grant #G008530317.
